

## EXPANDING NUTS

Expanding Nuts are used for hidden assemblies of panels, such as :

- ◆ rocker panels
- ◆ cladding elements
- ◆ undershield
- ◆ pre-assemblies of cladding elements

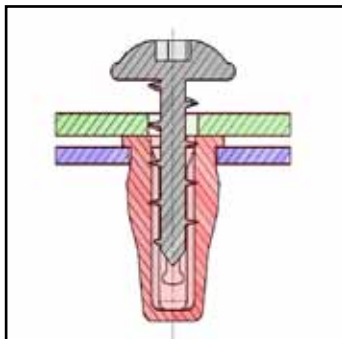

### PRODUCT DESCRIPTION

The expanding nuts are plastic components shaped with 2 legs or closed elements. The nut is expanded by the screw, granting the proper fixation between sheet metal and plastic panel.

### TECHNICAL DATA

- ◆ material: plastic (PA)
- ◆ possible use with wide range of different screws
- ◆ adapted for plate thicknesses from 0.4 mm to 4mm
- ◆ possibility of sealed version

### ADVANTAGES OF THE LISI SOLUTION

- ◆ easy installation
- ◆ cost effective
- ◆ no corrosion
- ◆ pre-assembly of cladding elements
