

## PRESS RELEASE

Paris, January 4th, 2023

### **LISI AUTOMOTIVE Former: Winner of the France 2030 call for projects**

#### **“Diversification of subcontractors in the automotive industry”**

LISI AUTOMOTIVE Former, Delle site, is one of the 10 winners of the France 2030 call for projects to "diversify subcontractors in the automotive industry", announced for the Bourgogne-Franche-Comté region. LISI AUTOMOTIVE Former has been awarded a grant of €916,500.

LISI AUTOMOTIVE is a sustainable supplier of multi-technology assembly solutions and critical components, and a development partner for manufacturers and equipment suppliers of new generation vehicles (connected, autonomous, light and electrified).

The Delle plant is specialized in the production of threaded fasteners for the automotive industry (OEMs and suppliers). The main manufacturing processes are cold heading, rolling, heat treatment and 100% quality control.

The "Delle Transformation" project aims to respond to the new type of fasteners intended for electric vehicles (long and thin screws and addition of a watertight sleeve) by modernizing the machine park, improving the competitiveness of the site (industry 4.0) while respecting the cleanliness requirements demanded by the principals.

#### **What is the aim of this call for projects?**

Faced with the profound upheavals linked to environmental and societal issues and aggravated by the impact of the health and Russian-Ukrainian crises, particularly with the sharp rise in energy costs, the France 2030 investment plan aims to support the vital needs of companies in the automotive sector for profound transformation.

Participation in the mobility of tomorrow is part of the daily work of LISI AUTOMOTIVE's teams: leader in products for the electrification of relative functions such as parking brake components, increase in mechatronics activity dedicated to seat mechanisms, gain in market share for products designed for electric drivetrains such as fastening systems for battery boxes, which will be produced at the Delle site.

LISI AUTOMOTIVE's ambitions are thus perfectly aligned with the objectives of the France 2030 call for projects, to support the transition of the automotive industry.

---

## **About LISI Group**

LISI is a global industrial group, specializing in the manufacture of assembly solutions and high value-added components for the aerospace, automotive and medical sectors. As a partner of the world's leading players and thanks to the commitment of nearly 10,000 employees in 13 countries on 4 continents, LISI innovates and invests in the research and development of tomorrow's products; to meet the needs of its clients, particularly in terms of quality, safety, and performance.

The LISI Group differentiates itself by focusing on two strategic areas: innovation and operational excellence, while integrating a strong CSR culture.
